PROJECTS I OFFICIALLY MANAGED

◆ EWMS Philippines Ticket Reselling Portal

- A platform where users can create accounts to start selling tickets for the EWorld Marketing Summit. Customers can purchase tickets via the SMTickets API.
- Admin dashboard available to monitor and manage resellers with their ticket sales history and manage transactions efficiently.

◆ TAMBAYCAP Distribution and Sales Inventory

- A web application for TAMBAYCAP resellers and distributors, featuring account creation with profile verification through QR codes.
- The platform supports cap authenticity checks with QR code verification and includes an admin panel to manage inventory, products, sales, fulfillment, and cap/member verification processes, ensuring seamless distribution and secure transactions..

◆ DROPPE Dropshipping Platform

- An e-commerce platform that enables multi-vendor dropshipping, allowing vendors to manage products, orders, shipments, and commissions.
- Affiliates can promote shops and products to earn commissions, with integrated payment and logistics APIs for streamlined transactions and fulfillment.

◆ MIBF Online Shop Platform

- A multi-vendor web application for the Manila International Book Fair, enabling an online book shopping experience.
- The platform integrates with delivery couriers J&T Express and Ninjavan API with Dragonpay payment gateway API, providing smooth transactions and efficient shipping for a seamless user experience.

◆ TTREND Inventory Centralized Management System

- A web application for centralized management of warehouse inventory, products, sales, and fulfillment.
- This platform consolidates logistics, finance, and reporting processes, providing comprehensive analytics and streamlined operations across the company's logistics and financial workflows.

◆ GYMHOB Online Log Digitalization

- A gym membership management system featuring QR code verification for easy member check-ins.
- The platform tracks daily member logins and subscriptions, with an admin dashboard to manage subscriptions, monitor customer activity, and oversee daily and monthly sales, ensuring efficient gym operations and accurate reporting.

WORK EXPERIENCES

◆ IWATCH PH International

- A network-based platform for selling products and services with a high-commission structure.
- As the Head of IT Development, I oversee system server maintenance, database management, and continuous user experience enhancements to support a scalable and efficient networked sales environment.

◆ KARINDERIA GO Online Delivery

- A mobile app for food delivery, connecting customers with local eateries for convenient ordering.
- As the Development Team Manager, I lead and coordinate the team to ensure smooth app development, functionality, and user satisfaction.

◆ TTREND Computer Distribution (Present)

- An e-commerce-based distribution network for computers and laptops across Shopee, Lazada, and TikTok, with options for reselling and warehousing fulfillment.
- As Head of Tech Innovation, I lead initiatives to centralize warehouse processes and implement data analytics, optimizing distribution efficiency and enhancing operational insights.
